

Create a Request Q & A

Q: What if the operation is not a contingency. Is there a default for non-contingency in the *Operational Name?

A: Yes. Though Operational Name is a Required field, Not Applicable is an acceptable entry.

Q: Are units going to be able to utilize this for training purposes for ICS?

A: Yes. The webinar series would be of definite value to use in conjunction with the current User Guides and any forthcoming Job Aides or TTPs.

Q: Is there a training module for practice?

A: Yes, we've been using a test environment called "The Sandbox". Please contact CDR Thomas Olenchock in CG-1B for access.
